

Adyapan
Schools

Generative Artificial Intelligence

DURATION : 2 MONTHS

Your first step of **transformation** begins, here and now.

At **Adyapan**, we go beyond traditional education. We provide transformative, mentor-led learning experiences designed to prepare the next generation of professionals for real-world challenges, especially in fast-evolving industries like SaaS, AI, Automation, and beyond.

Whether you're a student, working professional, or aspiring entrepreneur, our programs are built to help you gain practical skills, master emerging technologies, and build real-world projects.

so you don't just learn, you launch.

Mission

To cultivate a global community of innovators and professionals, equipped with the practical skills, mindset, and confidence to excel in modern, tech-driven industries.

Vision

To shape the future-ready workforce through accessible, hands-on, and mentor-led education, bridging the gap between aspiration and opportunity.

Say hello to Career Adyapan Program

A power-packed evolution of our mentorship program.

32+ hours of updated content

Elite mentor panel

Not one, but your own MVP project

**It's not just a program. It's your
career's switch.**

20k+

STUDENTS ASSISTED

30+

YEARS COMBINED
EXPERIENCE

100+

INDUSTRY EXPERTS

What is MVP?

MVP = Minimum Viable Product

The simplest working version of your idea

Built fast, with just the essentials, to test and validate in the real world. Instead of just learning, you launch early, learn faster, and grow smarter. It's not just a project. It's your first step into the real world of innovation.

Why MVP is a Game-Changer

Start thinking like a founder. No more just working on someone else's dream. With your MVP, you'll build your own. Learn to build, test, and adapt. Shift from learner to experts.

Key Highlights

Structured Skill Building

Start from basics, go up to advanced with guided mentorship

10 Practical Projects

One for every major module to ensure hands-on learning

One Live Launchpad Project

Internship-style team project with a real partner company

Cross-Domain Collaboration

Work with peers from AI, Data Science, etc. on a real product

Entrepreneurial Mindset Training

Learn how businesses think and operate

Live Industry Session

Interact directly with startup founders & tech recruiters

Portfolio-First Approach

Build a solid project portfolio that showcases real work

Two Certifications

Course Completion + Internship Certificate for maximum credibility

Outcome-Oriented

Build skills, confidence, and clarity for your next career move

Meet our Mentors

Backed by 50+ experienced mentors, we're here to guide, support, and inspire you every step of the way. With real-world expertise and a passion for teaching, our mentors make learning fun, practical, and truly transformative.

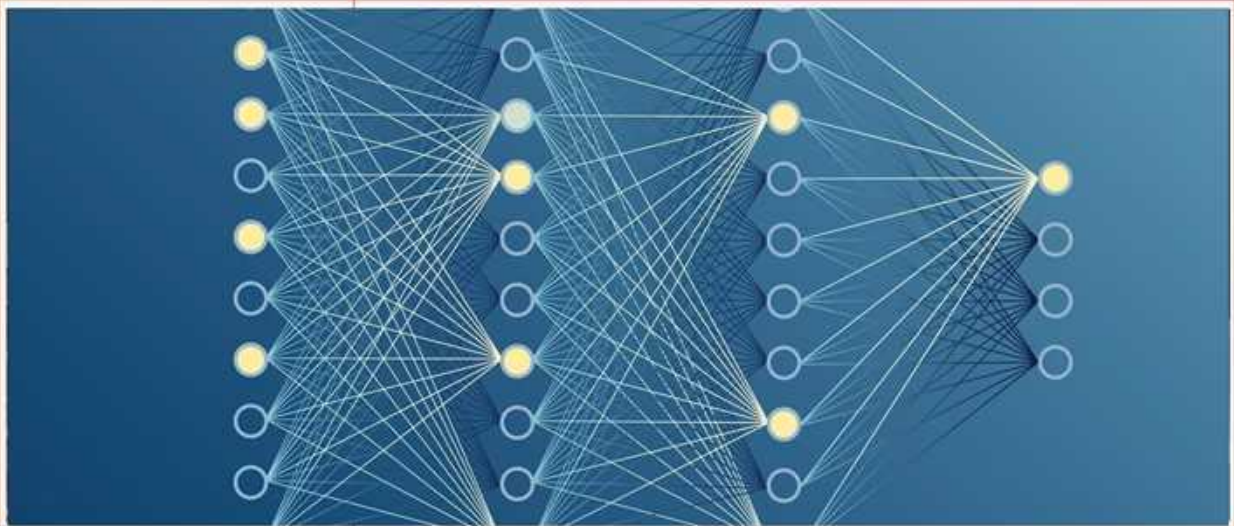

Lesson plan

Duration	Modules
Week 01	Introduction to Generative AI • Fundamentals of Generative AI • Applications of generative models • Overview of generative technologies • AI ethics and responsible AI
Week 02	Python & AI Foundations • Python basics for AI development • Working with data and libraries • Introduction to machine learning concepts • Data preprocessing basics

Duration	Modules
Week 03	Deep Learning Fundamentals • Neural networks basics • Activation functions and layers • Training deep learning models • Introduction to deep learning frameworks
Week 04	Generative Models • Introduction to generative models • Variational Autoencoders (VAE) basics • Generative Adversarial Networks (GANs) • Applications of generative models

Duration	Modules
Week 05	Large Language Models (LLMs) • Understanding large language models • Text generation techniques • Prompt engineering fundamentals • Applications in chatbots and automation
Week 06	Generative AI for Images & Media • Image generation techniques • Diffusion models basics • AI image and media creation tools • Practical AI creative projects
	

Duration	Modules
Week 07	AI Application Development • Building AI-powered applications • API integration for generative models • AI automation workflows • Performance optimization
Week 08	Capstone Project & Deployment • End-to-end generative AI project • Deploying AI models or apps • Portfolio development • Career guidance in AI

Still Wondering **If This Course** **Is for You?**

Explore the future of mobility by mastering electric and hybrid vehicle technologies, battery design, BMS systems, and sustainable automotive engineering.

This course is perfect for:

✓ **Students & Technology Learners**

✓ **Software Developers**

✓ **Creative Professionals**

✓ **Data Science**

✓ **AI Professionals**

✓ **Career Switchers**

Earn a certificate that proves your expertise!

Internship Completion Certificate

Course Completion Certificate

Accredited certificate course
from Skill India digital hub and NDSC.

Success Stories from those who've launched

Shravan Kumar
ady. alumna

I have done machine learning course. The course provided me so many opportunities to apply what I was learning to real-world scenarios through projects and assignments. The hands-on approach made it so much easier to grasp complex topics and prepared me well for using these skills in my career.

Simran Nagi
ady. alumna

The training and mentorship I received at Adyapan was a game-changer. My mentor not only guided me through real-world projects but also helped me build confidence in my skills. I'm now ready to tackle challenges in my career.

Sachander Kasthuri
ady. alumna

This program gave me hands-on experience and direct access to industry experts. I learned more in weeks than I had in months of self-study. It's been an incredible journey.

Vishnu Priya
ady. alumna

Thanks to Adyapan, I've gained both technical skills and career insights. The combination of training and mentorship was exactly what I needed to feel prepared and motivated for my professional path.
